

## Service modifications for Covid

- **All staff are screened for symptoms** before contact with members.
- **Staff will sanitize high-touch surfaces frequently.** You will likely observe this work. Some disinfecting solutions are designed to dry on surfaces and will therefore not be wiped or rinsed off. Once dry, these surfaces are safe for skin contact.
- **Social distancing** of at least six feet should be maintained whenever possible, indoors and out. (Members of the same household are not required to maintain distance.) Even if the occupancy limit of a space has not been reached, if one's preferred activity cannot be pursued with social distancing, one must wait until others leave the area.
- **Occupancy limits have been reduced** in all indoor spaces, pools, and spas.
- **Masks are required indoors** without exception.
- **Masks are required outdoors** when six feet of social distancing cannot be maintained from others outside your household. Other exceptions:
  - Persons under age five
  - Communicating with someone who must read lips
  - Medically unable
- **No one may enter or use any GVR facility (indoors or out) if they have symptoms of Covid-19** or flu-like illnesses. Members who appear to be ill will be asked to leave. If a member has had close contact with a person who develops flu-like symptoms, we ask that member to refrain from coming to GVR facilities until they have consulted a physician.
- **Showers and lockers are available on a limited basis.** Please do not linger in showers as others will likely be waiting.
- **Drinking fountains and ice machines may not be available.** Only touchless machines are online. Bring all the water you expect to need.
- **Pool noodles and life jackets are not available.** Members may bring their own, but may not share equipment with people they do not live with.
